

CAPTRUST Discretionary Strategy		Strategy Risk Metrics			Active vs. Passive		As of 5/31/23	
Wealth MAP Moderate		Expected Total Return	Expected Standard Deviation	Bond Duration	Active	Passive		
		5.50%	10.86%	3.36	42.1%	57.9%		
Strategic Overview	This discretionary strategy is designed for growth-oriented investors who prefer capital appreciation potential via stocks in addition to the downside protection and diversification of bonds. To achieve this investment objective, this strategy’s strategic targets allocate 60% to global stocks and 40% to income-producing asset classes.
