

Legal

The Legal department strives to obtain relevant and timely information to make informed business and legal decisions while focusing on mitigating risks. This begins with several key functions: (i) to provide sound legal assistance in the form of document preparation/management and review, (ii) to manage the legal work being performed by outside counsel to the related matters; and (iii) partner with our internal clients (departments) to offer advice on any legal issue related to their business specific concerns. Our goal is to effectively facilitate CAPTRUST's legal and business objectives
