

# HOW TO SET PDFs TO OPEN IN BROWSER

## PREMISE

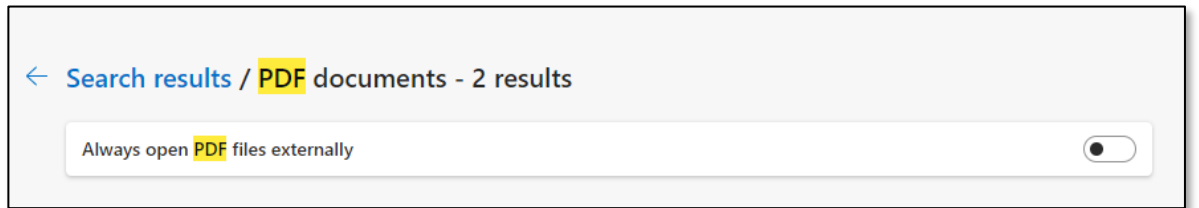

Sometimes you may want to reverse the behavior of what happens when you click a pdf file hyperlink in your web browser. These instructions will guide you through the quick process of forcing the pdf to open in your web browser as opposed to downloading or opening directly in Adobe Reader or Nitro. To select text in the pdf, select the Arrow tool at the top of Adobe Acrobat and Nitro.

## IN MICROSOFT EDGE

1. In the URL bar at the top of MS Edge, type or copy/paste the following, and then hit the Enter key: <edge://settings/content/pdfDocuments?search=pdf>

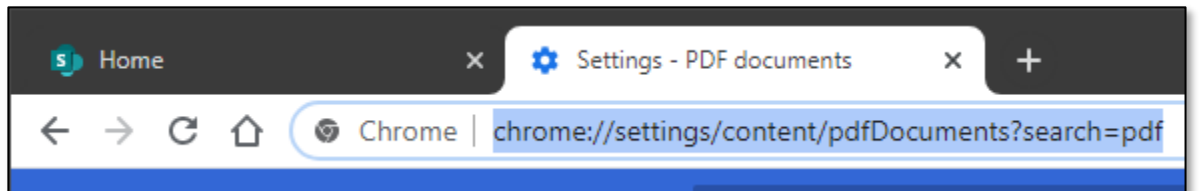

2. Make sure the toggle switch is unchecked (gray)

## IN GOOGLE CHROME

1. In the URL bar at the top of Chrome, type or copy/paste the following, and then hit the Enter key: <chrome://settings/content/pdfDocuments?search=pdf>

2. Make sure the toggle switch is unchecked (gray)
