Capital Market Overview

Market Commentary

- **Positive economic momentum continued through the first quarter**
 - GDP grew at 3.2% in Q1 following a 5.7% increase in Q4
 - Continuing jobless claims decreased from the fourth quarter
 - Equity market rally beginning in March 2009 continued through the first quarter
 - Positive returns in the non-Treasury sectors of the fixed income markets
- **Though the economy may have begun to turn the corner, the outlook remains uncertain**
 - Unemployment rate at 9.7%
 - Consumer sentiment decreased slightly in the first quarter
 - Housing prices have fallen 23% from their peak in Q2 2006
 - Developed economies have significantly levered balance sheets
 - Concern that massive government intervention may spark inflation in the future

Market Commentary

- **Equity markets continued to advance in the first quarter**

- S&P 500 gained 5.4% in the first quarter, marking the fourth consecutive quarter of positive returns. Over the one-year period, the index advanced 49.8%
- Developed international equity markets followed a similar trend, gaining 54.4% over the one-year period, with positive but modest first quarter returns of 0.9%. Emerging markets fared the best of the equity markets over the one-year period, returning 81.1%. For the quarter, emerging markets equities gained 2.4%
- Small cap stocks (Russell 2000) outperformed large cap stocks (Russell 1000) for the quarter by 320 basis points, while value stocks (Russell 1000 Value) outpaced growth stocks (Russell 1000 Growth) by 210 basis points

- **Riskier asset classes led the way in fixed income markets**

- High yield, asset backed, credit and mortgage sectors had positive returns in the first quarter. The Barclays High Yield index gained 4.6%
- Treasuries gained 1.1% in the quarter. US TIPS gained 0.4%
- Domestic core bonds, as measured by the Barclays Aggregate index, posted a 1.8% return for the year. Global bonds as measured by the Citi WGBI declined 1.3%

Executive Summary

Overview

- **Asset Growth and Allocation**

- Total assets were \$888.7 million at quarter end, an increase of \$12.6 million for the quarter, reflecting an investment gain of \$35.1 million and net cash outflows of \$22.5 million
- Assets increased \$173.3 million for the year, an increase comprised of \$235.1 million in positive investment returns and \$61.8 million of net cash outflows
- At quarter end, the overall equity commitment of 55.9%, which includes the equity allocations of GAA managers, was higher than the median peer group commitment of 54.7%

- **Fund Performance**

- The Fund posted a 4.1% return for the quarter, ranking in the 22nd percentile of the peer group and outperforming the median by 40 basis points. Active management added 80 basis points while asset allocation decisions added 10 basis points
- Over the one-year period, the Fund's 34.1% return ranked in the 37th percentile of the peer group, leading the median by 230 basis points. Over the period, active management added 260 basis points and asset allocation decisions detracted 250 basis points
- Over the three- and five-year periods, the Fund returned 0.4% and 4.9%, respectively, ranking in the 16th and 17th percentiles, respectively. Performance in the ten-year cumulative period ranks in the 16th percentile of the peer group
- Risk adjusted returns as measured by the Sharpe Ratio were favorable to the median for both the three- and five-year periods

+ CITIGROUP WORLD GOVT BOND	4.8 24	8.4 1	0.2 12
Median	4.0	12.3	0.1

Higher return and lower risk than the median portfolio. Risk adjusted returns, as measured by the Sharpe Ratio, were favorable

Manager Performance – Domestic Equity

- **Large Cap Core**

- **Manager A** led the index in the quarter but trailed by 510 basis points for the year. Over the one-year period low quality stocks within the S&P 500 outperformed high quality stocks. The strategy's bias to high quality names detracted from relative returns. The **Manager B** index fund tracked the S&P 500

- **Large Cap Value**

- **Manager D** trailed the Russell 1000 Value Index in the quarter. An underweight to financials hurt relative performance. The one-year return was above the benchmark due to favorable stock selection. **Manager C** performed in-line with the index for both the quarter and year. Both managers outperformed the index over the long-term cumulative periods ranging out to five years, with Manager D ahead of the median in all periods

Manager Performance – Domestic Equity

- **Large Cap Growth**

- The concentrated portfolio of **Manager E** led the Russell 1000 Growth index by 50 basis points in the quarter on strong performance by certain large holdings such as UNUM, which advanced 27%. Long-term performance trailed the index, reflecting weakness in 2009. Since inception performance remained strong
- **Manager F** led the benchmark in the quarter on favorable performance in the information technology and healthcare sectors. Performance exceeded the benchmark in all long-term cumulative periods
- **Manager G** led the index in the quarter. Longer-term performance trails the benchmark, impacted by swings between periods of low and high market volatility, and periods in which the relative performance difference between large and small cap stocks favored large cap names. These circumstances typically do not favor the Intech model

- **Mid Cap Growth**

- **Manager H** outperformed in the quarter on both favorable stock selection and sector positioning, including an overweight to consumer discretionary. The strategy favors high-quality names, a preference that hurt relative returns over the one-year period amidst a low quality rally. An underweight to the financial sector also hurt returns in 2009

Manager Performance – Domestic Equity

- **Small Cap**

- **Manager J** led the Russell 2000 Value Index by 280 basis points, posting the strongest quarterly return of the Plan's equity managers. Stock selection added value in the majority of sectors. One-year performance was ahead of the benchmark by 1560 basis points. Systematic's process of using free cash flow metrics to identify undervalued companies was rewarded in recent periods. The portfolio added relative value in all long-term periods
- **Manager I** added 210 basis points in the quarter on strong performance in the healthcare, industrials and energy sectors. The strategy outperformed the benchmark by a notable margin in all measured cumulative periods
- **Manager K** led the Russell 2000/Russell Microcap blend in the quarter and added 410 basis points of value for the year. Performance improved in recent periods as the smallest capitalization stocks rallied

Manager Performance – International Equity

- **International Developed Equity**

- **Manager M** outperformed the EAFE index in the quarter by 310 basis points on favorable stock selection in France, Norway, South Korea and Japan. Results were ahead of the benchmark over all measured periods
- **Manager L** led the EAFE index in the quarter but trailed the index by 100 basis points for the year. Relative results over the one-year period were hurt by stock selection in the European region. Results over the long-term are favorable

- **Emerging Equity**

- The **Manager N** emerging equity strategy led the MSCI Emerging Markets Index in the quarter on favorable performance in several sectors. Performance over the one-year period was ahead of the benchmark on favorable stock selection and country allocations. Performance over the longer-term periods was favorable, ranking in the top quartile over the five-year period.

Manager Performance – Fixed Income

- **Domestic Fixed Income**

- **Manager O's** portfolio was weighted in favor of the credit-related sectors of the Barclays Aggregate and outperformed in the quarter and year as the non-Treasury sectors of the index advanced. Performance was ahead of the Barclays Aggregate by 1520 basis points for the year, bringing longer-term performance ahead of the benchmark
- **Manager P** tracked the index in the quarter. Performance over the longer-term periods was modestly ahead of the benchmark
- The **Manager O** portfolio is composed primarily of agency and agency MBS holdings and is underweight the credit and treasury sectors of the Barclays Aggregate. The portfolio trailed in the quarter and one-year periods on the credit underweight

- **High Yield & Credit Opps**

- **Manager R** tracked the Barclays High Yield index for the quarter while performance for the year trailed. The sharp rally in the lowest credit quality sectors of the index made it difficult for managers to add relative value in the high yield universe over the one-year period. **Manager S** added 120 basis points of value in the first quarter continuing the favorable trend started in 2009

- **Global Bonds**

- **Manager T** outperformed the Citi WGBI in the quarter on the strength of overweight allocations to Australia, Poland and Sweden, and a bias to financial sector corporate bonds, where spreads continued to tighten. An underweight to the euro area also aided results. Long-term performance remained favorable relative to the peer universe, ranking in the top quartile in the three- and five-year periods

Note: High yield composite performance over the long-term reflects Manager BB (terminated in Dec 08) and Manager CC (terminated in Apr 05)

Manager Performance – GAA & Hedge Funds

- **GAA**

- **Manager V** has underperformed in recent periods due to underweight exposure to equity markets and a relative emphasis on high quality stocks. Defensive positioning and a quality bias within the equity allocation have contributed to strong relative results over the longer-term periods
- **Manager U** performance has been strong as equity and credit markets rebounded. Performance for the quarter was positive across most strategy elements including overweight equity exposure. The impact of weak 2008 performance remains evident in longer-term results

- **Market Neutral & Hedge Funds**

- **Manager W** and **Manager X** performed similar to the HFRI Fund of Funds index for the quarter. **Manager Y** trailed the same index. Manager Y's returns were hampered by weakness on the part of a financial sector manager and defensive positioning among other managers. Performance of Manager W and Manager Y was favorable over longer-term annualized periods, while Mariner trailed

- **Real Estate**

- The core real estate funds managed by Manager Z and Manager AA reported positive returns in the first quarter generating both positive income and appreciation returns. Returns over the longer-term periods for the **Manager Z** trailed the NCREIF Property Index while **Manager AA** led or tracked the benchmark. Performance of both funds is better than the NCREIF ODCE, an index of open-ended core funds

Manager Notes

- **Manager X**

- Manager X has a trading and service agreement with Manager DD whereby Manager DD managed \$50 million in assets on behalf of Manager X for their multi-strategy funds and Manager X provided back-office support to Manager DD, which was primarily marketing
- A co-founder and an analyst from Manager DD have recently been charged by the SEC with insider trading
- Upon notice of the SEC charges, Manager X terminated the relationship with Manager DD and liquidated the \$50 million in assets managed by Manager DD for the Manager DD Partners and Manager DD Atlantic funds
 - ABC Public Fund is invested in Manager X Select, a separate fund
- Manager X is not involved in the SEC lawsuit in any manner
- NEPC recommends no client action as a result of the above circumstances

Manager Notes

- **Manager G**

- Manager G lost \$5.4 billion in assets under management (AUM) in 2009, bringing total assets down to \$48 billion. AUM has declined over 30% since 2007
- Process enhancements are expected to be announced in the second quarter of 2010 but have not been specifically identified
- Dr. A, VP and Sr. Investment Officer, is leaving his role as head of the Florida research team to return to academia
 - Dr. B will assume his responsibilities on an interim basis
- In December 2008 Manager G announced numerous organizational changes regarding transition of the firm's leadership
 - New hires and process initiatives were also announced
- NEPC has Manager G on watch status but recommends no client action at this time

- **Manager U**

- Mr. C was hired as head of Asset Allocation Research in the first quarter, replacing Ms. D. Previously she was Executive Director of Global Macro and Asset Allocation at Manager EE
- Previously announced redemption policy changes remain in place
 - Liquidity terms were improved to twice monthly with five business days notice

Manager Notes

- **Manager V**

- Redemption fees are no longer applicable to cash redemptions from the Manager V Global Balanced Asset Allocation Fund
- Manager V had previously applied fees of up to 2% on cash redemptions

- **Manager Z and Manager AA**

- The Manager Z and Manager AA real estate funds experienced positive income and appreciation returns in the first quarter. Performance over the longer-term has been impacted by the difficult real estate markets
 - Though the difficult markets have impacted the performance of the funds, their performance and debt levels are comparable to many large core real estate funds
- Manager Z satisfied its redemption queue in the first quarter. Manager Z is expected to pay off its redemption queue on July 1, 2010
- Manager AA reports 2% of its debt maturing in 2010
 - Manager AA reported no third party borrowings

Asset Allocation vs. ICC Universe

ICC Average Allocation – Public Funds \$500 million - \$2.5 billion

ABC Public Fund Actual Asset Allocation

2010 Capital Market Observations & Expectations

- **2009 provided a much needed respite**
 - Recovery across all risky markets; a strong reversal of 2008
 - Unfortunately, the gains did not offset prior losses
 - **We are cautious and concerned about the near-term**
 - Structural imbalance remains despite positive signs
 - Increased “tail” risks with regard to inflation and the dollar
-
- **Institutional investors remain challenged**
 - Low projected return environment
 - **We still see opportunities for clients to improve portfolios**
 - Adopt/maintain focus on allocation of risk
 - Be willing to lead and take advantage of opportunities

2010 General Actions for Clients

- **Continue to assess the future from a risk management perspective**
 - Confirm long-term goals and objectives
 - Where is risk being taken? – Risk budgeting
 - What environments are unlikely but harmful? – Scenario analysis
 - Avoid chasing returns in a lower return environment
- **Review the role of fixed income**
 - Meeting program objectives – liquidity, timing, duration, nominal/real commitments
 - Tail-risk management for deflation and inflation
 - Short-term yields are low, the yield curve is steep and credit spreads have tightened
 - Future credit opportunities involve manager skill more than just market exposure
 - Give greater discretion to managers with a broad credit skill set
 - Lend with favorable terms in distressed debt and mezzanine lending

2010 General Actions for Clients

- **Build strategic exposure to real assets**
 - Higher inflation expectations may already be priced into some markets
- **Overweight emerging market investments to protect from dollar losses**
- **Retain focus on diversification in a time of uncertainty**

2010 Work Plan

- **Annual asset allocation study**
 - Risk budgeting
 - Incorporating 2010 asset class assumptions
- **Asset class recommendations**
 - Overweight allocation to emerging markets
 - Consideration of real assets
 - Potentially rebalance GAA allocation to include strategy with inflation-hedging characteristics such as Manager FF
 - Real asset exposure could also be gained through a dedicated commodities allocation
- **Private equity plan recommendations**
 - \$5 million commitment to secondaries – 2009 plan
 - \$5 million commitment to distressed – 2010 plan

2010 Work Plan

- **Education studies**
 - Real assets/inflation
 - Continuation of Trustee education series
 - **Ongoing quarterly performance**
 - **Manager reviews and searches as needed**
-

Memo: Target with 2009 Assumptions

Expected Return	9.0%
Expected Risk	12.6%

- Expected return and risk is shown for the current allocation, the current target and two alternative asset mixes
- Mix A reflects a rebalancing of the equity allocation in favor of emerging markets and an expansion of the GAA allocation to include an inflation-hedging strategy such as Manager FF
- Mix B is similar to Mix A but adds a dedicated real assets allocation to diversify the inflation-hedging characteristics of the portfolio
- Expected return and risk is calculated using NEPC's 5-7 year capital market assumptions as updated for the period beginning January 2010. Return assumptions reflect market returns and do not include value added through active management
- Returns using NEPC's long-term 30-year assumptions are approximately 100 basis points higher
