

SAFETY DATA SHEET

Section 1: Identification

Product Name: TwinOxide 0.005% aqueous solution

Chemical Name/Synonyms:

Company: TwinOxide International B.V., De Tongelreep 17 NL-5684 PZ Best

Telephone: +31 499 32 92 42 Fax: +31 499 32 96 20

Email: <u>Info@twinoxide.com</u> Internet: www.twinoxide.com

TwinOxide is a biocide and oxidizing agent for water purification.

In emergency call 911.

www.twinoxide.com/ GIZ Nord Tel.: +49 (0) 551 - 1 92 40

This number is only available during office hours. USA Tel: 303-877-3684 Joe Nieusma, PhD toxicologist

Section 2: Hazard(s) Identification

Hazard Classification: potential eye irritation

Signal Word(s): Warning

Hazard Statements: No adverse effects from labeled usage expected

Pictograms:

Precautionary Statements: Chlorine dioxide solution in concentrations of 0.005% or less is potentially irritating to the eyes. Chlorine dioxide is quickly broken down into other chlorine derivatives such as chlorate, chlorite and chloride.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present, continue rinsing.

If eye irritation persists: Get medical attention.

Description of other hazards: No other hazards are expected for the 0.005% or less

solution of chlorine dioxide.

Section 3: Composition/Information on Ingredients

Mixtures Hazardous components

CAS No	Chemical name	Quantity
10049-04-4	Chlorine dioxide	0.005 %

Potential for eye irritation.

This liquid product is made of TwinOxide component A and component B.

Section 4: First-Aid Measures

1. <u>Description of first aid measures</u> General information

First aider: Pay attention to self-protection.

Symptoms of exposure may develop several hours following exposure. Remove affected person to a well-ventilated area. Drink plenty of water.

If symptoms of exposure persist for several days, see a physician.

After inhalation

Remove person to fresh air if chlorine dioxide has been inhaled. Drink plenty of water.

After contact with skin

After contact with skin, wash immediately with plenty of water and soap. Take off contaminated clothing and wash it before reuse. In case of skin irritation, seek medical treatment.

After contact with eyes

In case of contact with eyes, rinse immediately with plenty of flowing water for 10 to 15 minutes holding eyelids apart.

After ingestion

Rinse mouth immediately and drink plenty of water. Never give anything by mouth to an unconscious person. Do not induce vomiting.

2. Most important symptoms and effects, both acute and delayed

Potential for eye irritation.

Section 5: Fire-Fighting Measures

1. Extinguishing media Suitable extinguishing media

Water is recommended since chlorine dioxide is soluble in water and the toxic effects are reduced on dilution. Foam. Dry extinguishing powder. Carbon dioxide (CO₂).

2. Advice for firefighters

Wear self-contained breathing apparatus. Full protective suit. Use water spray jet to protect personnel and to cool endangered containers. Suppress gases / fumes with water spray jet.

Section 6: Accidental Release Measures

1. Provide adequate ventilation. No adverse effects of release expected. Avoid contact with eyes.

2. Environmental precautions

Chlorine dioxide at 0.005% is not an environmental hazard. Spills of chlorine dioxide solutions should be diluted to a low concentration using large volume of water. Rinse spills away to drain.

3. Methods and material for containment and cleaning up very large volume spills:

Absorb with liquid-binding material (e.g. sand, diatomaceous earth, or universal binding agents). Treat the recovered material as prescribed in the section on waste disposal.

Section 7: Handling and Storage

Advice on safe handling

Store for use in closed containers. No adverse effects of handling 0.005% solution expected. Handle and open container with care.

Advice on protection against fire and explosion

Gaseous chlorine dioxide is emitted on heating. Chlorine dioxide solutions are not flammable or explosive at 0.005%. Usual measures for fire prevention.

Further information on handling

At the diluted use levels, it is noncorrosive.

1. Conditions for safe storage, including any incompatibilities

Requirements for storage rooms and vessels

Store in closed container or well-ventilated area. Keep/Store only in original container. Keep container tightly closed.

Advice on storage compatibility

Keep away from: acid. Alkalis (alkalis). Oxidizing agents, strong. Reducing agents.

Further information on storage conditions

Keep in a cool, well-ventilated place. Handle and open container with care. Protect against direct sunlight. Keep away from heat.

2. Specific end use(s)

Storage stability: at room temperature at least 4 weeks; cool and protected from light stability is up to 9 to 12 months. More Identified uses: biocides and oxidizing agents.

Chemical Name OSHA PEL OSHA PEL (ceiling) ACGIH OEL (TWA) ACGIH OEL (STEL) Chlorine dioxide 0.1 ppm 0.3 ppm 0.1 ppm 0.3 ppm

Exposure controls protective and hygiene measures

Do not eat, drink or smoke. Do not breathe vapor. Avoid contact with eyes.

Eye/face protection

Eyeglasses with side protection (DIN EN 166)

Hand protection

Hand protection is not required for 0.005% solution.

Skin protection

Skin protection is not required for 0.005% solution.

Respiratory protection

Respiratory protection is not required for 0.005% solution.

Environmental exposure controls

Environmental exposure protection is not required for 0.005% solution.

Section 9: Physical and Chemical Properties

Form: yellow liquid

Odor: slight to mild chlorine pool odor **Odor threshold:** not determined

pH: ~2

Melting point/melting range: -2 °C Water Boiling point/boiling range: ~102 °C Water

Flash point: not applicable Evaporation rate: not determined Flammability: not applicable

Upper/lower flammability or explosive limits: not applicable

Auto ignition temperature: not applicable

Danger of explosion: at very high levels of >12% in air

Vapor pressure: not determined **Vapor density:** ~1.10 g/cm³

Solubility in/Miscibility with water: completely miscible

Section 10: Stability and Reactivity

1. Reactivity

No hazardous reaction when handled and stored according to provisions.

2. Chemical stability

The product is stable under storage at normal ambient temperatures. Chlorine dioxide has higher solubility at colder temperatures enhancing stability.

3. Possibility of hazardous reactions

No known hazardous reactions.

4. Conditions to avoid

High heat (slow decomposition). Avoid direct sunlight.

5. Incompatible materials

Acid. Oxidizing agents, strong. Reducing agents. Corrosive to Metals and metal alloys. Non-corrosive to metals when diluted with water to concentrations less than 7 PPM.

6. <u>Hazardous decomposition products</u>

Chlorine compounds.

Section 11: Toxicological Information

Acute toxicity: Rat Oral LD50 93.86 mg/kg BW

Potential routes of exposure/potential health effects

Skin: skin protection is not required for 0.005% solution.

Eye: potential eye irritant.

<u>Inhalation:</u> respiratory irritation not expected for 0.005% solution.

Ingestion: mucous membrane irritation not expected for 0.005% solution.

<u>Carcinogenic effects:</u> No information available <u>Mutagenic effects:</u> No information available <u>Reproductive toxicity:</u> No information available

Sensitization: No information available

Target organs: Eyes

Section 12: Ecological Information (non-mandatory)

1. Toxicity of concentrated chlorine dioxide

CAS 10049-04-4 Chlorine dioxide

Acute fish toxicity LC50 2.563 mg/l 96 h Brachydanio rerio (zebra-fish)

Fish toxicity NOEC 2.063 mg/l 2 d Brachydanio rerio (zebra-fish)

- 2. Persistence and degradability: Inorganic product which is not eliminable from water through biological cleaning processes.
- 3. Bioaccumulative potential: Not relevant.
- 4. Mobility in soil: The product has not been tested.
- 5. Results of PBT and vPvB assessment: The substances in the mixture do not meet the PBT/vPvB criteria according to REACH, annex XIII.
- 6. Other adverse effects: No expected adverse effects of 0.005% solution.

Section 13: Disposal Considerations (non-mandatory)

13.1. Waste treatment methods

Waste disposal number of waste from residues/unused products

190899 WASTES FROM WASTE MANAGEMENT FACILITIES, OFF-SITE WASTEWATER TREATMENT PLANTS AND THE PREPARATION OF WATER INTENDED FOR HUMAN CONSUMPTION AND WATER FOR INDUSTRIAL USE; wastes from wastewater treatment plants not otherwise specified; wastes not otherwise specified

Contaminated packaging

Wash with plenty of water. Completely emptied packages can be recycled.

Section 14: Transport Information (non-mandatory)

DOT regulations: no known restrictions
 Hazard class: no known restrictions

Section 15: Regulatory Information (non-mandatory)

US Federal Regulations

SARA Section 355 (extremely hazardous substances): no known restrictions SARA Section 313 (specific toxic chemical listings): no known restrictions

Clean Air Act, Section 112 Hazardous Air Pollutants (HAPs): no known restrictions

TSCA (Toxic Substances Control Act): no known restrictions

Section 16: Other Information

SDS date of preparation/update: 3/16/2020
